Traditional Norwegian Weaving: American Reboot

Inspired by historical textiles, American weavers have used Norwegian weaving techniques to create a new body of work, contemporary in design or materials. Enjoy traditional pieces from the collection of the Vesterheim Norwegian American Museum and outstanding weavings from recent decades that honor the past and break through with modern expression.

This exhibit includes 40 pieces based on several techniques, including rya; tapestry; krokbragd and other boundweave variants; band weaving; and overshot weaves such as monk's belt and skilbragd. Read more about the pieces on the Scandinavian Weaver's Study Group blog: scandinavianweaversmn.com
